Subject: Progress Report #6

Jim:

Excavation at the Flyway site has been completed on the peninsula which includes grid numbers G2, G3, H2, and H3. There have been approximately 15,200 yards of soil hauled to the mine site. During the Labor Day weekend, the road from the amphitheatre to the mine dump site was graded in order to eliminate the rough conditions. There have been no accidents and cooperation between the parties continues to be excellent.

Bob Marriam
